

ABOUT

Having worked with more than 500 educators and 5,000 parents over the past 7 years we've noticed a pattern emerging amongst support crews.

Many educators and parents (aka support crew) are thirsty for their own resources and guidance so that they can build confidence, a network and a knowledge bank to support their kidpreneurs.

We aim to bridge this gap with resources, webinars, and professional development courses dedicated to helping support crews build your knowledge bank and networks to maximise your kidpreneur experience.

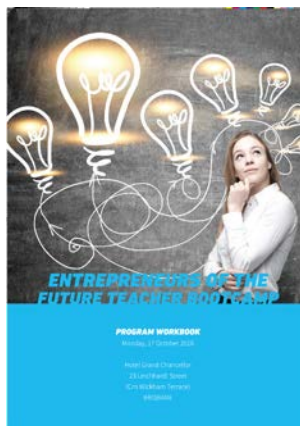

It's about inspiration, information and empowerment. Through these digital and real-world programs you will talk to entrepreneurs, meet business professionals and learn teaching strategies from entrepreneurship education experts. Register now to find out more.
